GRAYS HARBOR LTMS ALTERNATIVES WORKSHOP

JANUARY 2009

END OF MEETING - HIGH LEVEL TABLE REPORT OUTS

OVERALL - WHAT YOU LIKE

- We want a permanent solution to the problem vs/ temporary -
- Diffraction structures
- A system that works together & functions
- Long term solutions that are cost effective
- Less impact - Replenishment
- Corps becomes more pro-active on trigger response

OVERALL - WHAT YOU DISLIKE

- Short Term
- Reactive vs/ Proactive
- Stockpile Concerns
- Sand Dune on Private Property
- Risk of damage w/ breach is uncomfortable for property owners
- Need Costs Available - Easier
- Does not address permitability, tribal
- Practicality of Corps - Legal
- Diffraction Structure - will cut into ½ Moon Bay
- weir → sand transport ↑ ↓ increase current velocity
- Revised Jetty Extension
- Anything = increased erosion
- ~~DIFFERENT ACTION~~
- Impacts on Recreation / Public Trust / Surrounding Areas
- Sand Placement to +9 is not addressing the erosion problem

WHAT CRITERIA DID YOU USE MOST?

- Self Sustaining Project
- Local Access
- Permenant Fix
- Sediment Transport
- Cost for...
- Environmental
- Navigation Functionality
- Keep the beach Sand
- Infrastructure
- Recreation
- Performance Data/Environmental Data

* The Devil is in the details!

* Demonstrate what action will do it! Rock vs Sand
