PUBLIC NOTICE FOR FEDERAL REGISTER NOTICE ANNOUNCING THE REISSUANCE OF THE NATIONWIDE PERMITS

On February 21, 2012, the U.S. Army Corps of Engineers (Corps) published the notice in the *Federal Register* announcing the reissuance of all existing nationwide permits (NWP), general conditions, and definitions with some modifications. The Corps also issued two new NWPs, three new general conditions, and three new definitions. The NWPs will be effective on March 19, 2012, and will expire on March 18, 2017.

With the publication of this *Federal Register* notice, Corps districts will begin finalizing their regional conditions for the new and reissued NWPs. Regional conditions will provide additional protection for the aquatic environment, and will help ensure that the NWPs authorize only those activities with minimal adverse effects on the aquatic environment. Regional conditions will help ensure protection of high value waters within the Seattle District.

The publication of this *Federal Register* notice also begins the 60-day period for states, Indian Tribes, and the Environmental Protection Agency (EPA) to complete their water quality certification (WQC) process for the NWPs. This *Federal Register* notice also begins the 90-day period for coastal states to complete their Coastal Zone Management Act (CZMA) consistency determination processes.

While the states, Indian Tribes, and EPA complete their WQC processes, the use of an NWP to authorize a discharge into waters of the United States is contingent upon obtaining individual water quality certification or a case-specific WQC waiver. Likewise, while coastal states complete their CZMA consistency determination processes, the use of a NWP to authorize an activity within, or outside, a state's coastal zone that will affect land or water uses or natural resources of that state's coastal zone, is contingent upon obtaining an individual CZMA consistency determination, or a case-specific presumption of CZMA concurrence.

The February 21, 2012, *Federal Register* notice is available for viewing at Seattle District at 4735 East Marginal Way South, Seattle, Washington 98134 or on the Internet at <http://www.usace.army.mil/Missions/CivilWorks/RegulatoryProgramandPermits/NationwidePermits.aspx>. As an alternate, Internet users can access the *Federal Register* through the U.S. Government Printing Office at <http://www.gpo.gov/fdsys/browse/collection.action?collectionCode=FR>.

The Corps has also issued final decision documents for the new and reissued NWP's. These documents are also available at the Corps district office and on the Internet at <http://www.usace.army.mil/Missions/CivilWorks/RegulatoryProgramandPermits/NationwidePermits.aspx>

Furthermore, the NWP decision documents will be supplemented by Division Engineers to address decisions concerning the addition of regional conditions to the NWP's. Enclosed is a list of the final NWP's and conditions. They are also available through the Corps Home Page or the *Federal Register*.
