

Freshwater and Marine Sediment Tests

Tasks 1) Evaluate freshwater toxicity and bioaccumulation tests. 2) Evaluate the sensitivity of freshwater 10-day vs. longer term tests for amphipods and midges. 3) Evaluate whether current tests adequately address sublethal endpoints. 4) Evaluate whether current tests are appropriate to adequately address unique chemicals and chemical mixtures. 5) Evaluate whether current tests are appropriate for protecting ESA species. 6) Evaluate and/or develop additional FW tests, as necessary. 7) Evaluate Rapid Screening Assessment methods/procedures.
