

WYNOOCHEE LAKE, WASHINGTON (FLOOD CONTROL)

CONDITION OF IMPROVEMENT, 30 SEPTEMBER 1979 EXISTING

PROJECT: The project includes a concrete and earthfill dam 177 feet high on Wynoochee River about 37 miles north of Montesano, creating a reservoir of 70,000 acre-feet of total storage for flood control water supply, irrigation, fish and wildlife, and recreation. Public Law 93/251, approved 7 March 1974, authorized payment not to exceed \$696,000 to State of Washington for fish mitigation for life of the project. Local interests must repay costs allocated to water supply and irrigation, as determined in accordance with existing Federal laws Progress Of Work: Project was completed 1 January 1975. Housing (3 residences), additional storage facilities, and an additional public restroom were constructed in 1979. Cost Of Construction: \$23,494,443 (including \$102,199 Code 710 funds).
