

Purpose

Contractors Registration for Equipment/Materials

Introduction

Welcome to the Corps of Engineers (Seattle District) rental equipment and material registration site.

During times of emergencies the Corps of Engineers requires immediate access to various types of heavy equipment and materials. Requirements are generated at all times of the day and night. This site is intended for you to communicate to us the types of equipment and/or material you have available. We have provided the classification of equipment and type of material that historically is most in demand. If you wish to register your equipment and material it will be your responsibility to keep the information up to date. Registration is no guarantee that your items will be used, however this site will become a primary source of information for us during an emergency.

Getting Started

- 1) A Data Universal Numbering System (DUNS) number which can be obtained by calling 1-866-705-5711 or online at the [Dun and Bradstreet site](#).
- 2) A Commercial And Government Entity (CAGE) code from the [Central Contractor Registration \(CCR\)](#).
- 3) After completing the two previous steps, [register your equipment with the Seattle District](#).

Contracts cannot be issued without a valid and unexpired CAGE code.

Doing Business with the U.S. Army Corps of Engineers

The Seattle District does not maintain a small works roster for bidding purposes; this flood and flood rehabilitation equipment site is the exception. The following is a list of web sites and some general information that will assist you in the process of doing business with the Seattle District Corps of Engineers.

To obtain information regarding future work go to [FedBizOps](#).

For information regarding current [Seattle District Solicitations](#).
