

APPROVED WORK WINDOWS FOR LISTED/PROPOSED FISH SPECIES BY SPECIFIC STREAM AND TRIBUTARY – ALL FRESHWATERS *excluding* WATERS WITHIN NATIONAL PARK BOUNDARIES, COLUMBIA RIVER, SNAKE RIVER, AND LAKES

- (1) The general work window for a county applies to all streams within that county, unless otherwise indicated under specific stream and tributary work windows.
- (2) The work window for a listed stream applies to all its tributaries, unless otherwise indicated. Some streams flow through multiple counties. Check the listing for the county in which work is to be conducted to determine the work window for that stream.
- (3) Where a tributary is listed as a boundary, that boundary shall be the line perpendicular to the receiving stream that is projected from the most upstream point of the tributary mouth to the opposite bank of the receiving stream. (See Figure C-1)

Figure 1. Stream boundary line

- (4) Where a river, stream or tributary enters a marine or estuarine water *except* for the Columbia River system, work windows listed in Table C-4 (Marine and Estuarine waters) will apply to all tidally influenced portion of the river, stream or tributary.
- (5) Work within two hundred (200) feet landward of the State's ordinary high water line in waters of the U.S. listed as "submit application" or "closed" is not authorized by the Washington State Department of Fish and Wildlife (WDFW). Site review and a specific written authorization (and State HPA) are required for these state waters.
- (6) Lakes do not include impoundments of the Columbia or Snake Rivers.
- (7) These "approved work windows" are based on best available information as of the date of the

Services' concurrence with this informal consultation. They may be amended or deleted in the future as new information is obtained. The Corps will use the most current version of these windows when the authorizing projects for which conformance with the ESA is in part based on the windows in this programmatic consultation.
