3. **PROSPECTIVE OFFERORS:** The Director of Defense Procurement has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to require contractors to be registered in the DOD Central Contractor Registration (CCR) for awards resulting from solicitations issued after May 31, 1998.

This rule more efficiently implements the Debt Collection Improvement Act of 1996 as it requires contractors to be registered in CCR for consideration of future solicitations, awards, and payment. Registration is required prior to award of any contract, basic agreement, basic ordering agreement, or blanket purchase agreement from a solicitation issued after May 31, 1998. **LACK OF REGISTRATION IN THE CCR DATABASE WILL MAKE AN OFFER INELIGIBLE FOR AWARD.**

The WEB Site may be accessed at <http://www.ccr.gov>. You may call 1-888-227-2423 to obtain a Registration Packet or to Register on Line at WWW.ACQ.OSD.MIL/EC.

4. FACNET and NON-FACNET responses will be accepted. Responses may be faxed until the time and date set for closing. Attention by faxes to Vincent Daniels, (206) 764-6817.

STATEMENT OF WORK
CENWS-EC-DB-CS

2 July 2004

PROJECT: ADDITIONAL WATER STORAGE, HOWARD A. HANSON DAM,
WASHINGTON

LOCATION: HOWARD A. HANSON DAM, KING COUNTY, WASHINGTON.

SCOPE:

PROVIDE TRUCK-MOUNTED ROTOSONIC DRILL RIG AND SUPPORT VEHICLE WITH OPERATOR(S): Work shall consist of drilling up to three holes, 160 feet deep and 6-inch diameter each using the rotosonic drill method. The exploration work shall be two 160' holes with an option for a third 160' hole for a total depth of 480 feet. Each hole shall have a single stage piezometer installed as directed. The piezometers shall be a 2-inch outside diameter, Schedule 80 plastic pipe and shall be flush-mounted with the existing ground surface using a Contractor furnished lockable, weather-tight flush-mounted casing/cap. A typical piezometer installation detail is attached and actual installation details will be as directed at the time of installation. The Contractor shall furnish all materials for piezometer installation. Sampling shall be continuous throughout the entire depth of each exploration hole. Samples shall be collected from the rotosonic core for visual classification. Holes shall be backfilled with approved backfill materials (Bentonite Chips) per regulations of the Washington State Department of Ecology (WAC 173-160) for well closure.

Howard A. Hanson Dam is situated in the City of Tacoma Watershed. The access to the dam is regulated by Tacoma Public Utilities; see attached site-specific supplementary requirements for access and restrictions. The Contractor shall take all necessary precautions to assure that sediment, debris, petroleum products, chemicals or other contaminants will not enter the Howard Hanson Reservoir or the Green River which is the City of Tacoma public water supply and a valuable fishery resource. Acceptable levels of contaminants for the work shall be as specified under the rules and regulations of the State of Washington Administrative Code (WAC), the Water Quality Standards or as required by the permits or agreements with all federal, state, and local agencies for this project.

Human excrement or urine shall not be voided or deposited on the watershed, nor shall any garbage, food waste, or other form of decaying, foul, noxious or putrescible matter, either liquid or solid, be thrown, spread or otherwise deposited on, or beneath the surface of the ground. Sanitary facilities shall be provided by the Government.

All spoils from drilling operations disposed of in the watershed shall be free of petroleum, chemical or other hazardous waste. Spoils resulting from petroleum or chemical spill clean-up activities shall be transported out of the watershed and legally disposed of. Disposal of "clean" drill cuttings by the Contractor shall be deposited in a Government designated area located approximately 2 miles from the Hanson Dam Administration Building.

All equipment, operating or idle, in a location for more than one hour shall have oil absorbent pads placed beneath it. Other containment methods such as containment basins may be used as approved by Contracting Officer. Soiled pads shall be replaced as often as necessary to preclude runoff of water containing petroleum sheens. Pads and/or basins need to be picked up immediately when equipment is moved.

The Contractor shall be responsible for providing any water requirements for the anticipated work. Water may be drawn from the reservoir but such water is not regarded as potable. To ensure water quality, the Contractor shall provide a backflow prevention device, approved by the Contracting Officer, for use in drawing water from the reservoir. Equipment for withdrawal of water from reservoir, ie. hose and screen shall be decontaminated prior to use in the reservoir.

The drilling Contractor shall furnish an Activity Hazard Analysis and a Spill Prevention, Containment, and Cleanup Plan prior to commencement of the proposed work.

Estimated time for completion is 12 days for three holes (Estimated time includes drilling time, sampling, installing piezometers, backfilling of holes, moving between holes, and clean up).

WORK IS TO BE CONDUCTED BETWEEN August 2004 and the 1st week of September 2004.

SITE SPECIFIC SUPPLEMENTARY REQUIREMENTS

PART I GENERAL

1.1 COORDINATION AND WORK HOURS

1.1.1 Coordination with using agencies, to include Howard Hanson Dam Operations and Tacoma Public Utilities (TPU), shall be made through the Contracting Officer to assist the Contractor in completing the work with a minimum of interference and inconvenience.

1.1.2 Work hours in the construction area may be restricted as directed by the Contracting Officer.

1.2 GENERAL ACCESS REQUIREMENTS

This section describes controls and restrictions regarding site access and Green River watershed activities. The watershed provides drinking water for over 300,000 people and must necessarily be protected during construction. Only authorized personnel (Government personnel or Contractor personnel participating in Government business) may enter the restricted watershed.

1.2.1 Access to Howard Hanson Dam structures will be controlled at an entrance guard station operated by TPU. TPU will issue permits for the Contractor's vehicles on the first occasion they come to the guard station. Access can be expedited by notifying the Tacoma control station, at (206) 502-8346, and the Corps of Engineers Project Office at (206) 886-2911, in advance. Incoming traffic will be restricted from entering the controlled area until proper identification is provided. Access on a regular basis and during other than established working hours will require prior coordination and approval by the Contracting Officer.

1.2.2 Access to the Green River Watershed will be permitted only to those persons actually engaged in operations authorized by the Contractor by permit from (TPU). Access to the watershed is permitted only at such times as personnel are on direct work assignment. Wandering from the work area or engaging in any activity other than that authorized is not permitted. If there is probable cause to believe that there has been a violation of the regulations, then any such vehicle or vehicles as may appear to be involved in such violations may be stopped and inspected by TPU or the Contracting Officer's Representatives. The refusal by the operator of any such designated vehicle to permit such inspection may be deemed sufficient reason to deny that operator further access to the watershed.

1.2.3 The Contractor shall submit a complete listing of Contractor personnel, including job title and identification credential number, who will be working on the project. This listing shall be updated as needed to ensure that the Government has been notified of any

changes of Contractor Personnel in advance of new personnel engaging in work on the project. The Government will allow access to the controlled areas of only the Contractor Personnel authorized in advance and included on the employee listing. The list will be submitted the week prior to personnel arrival on-site. The list shall be revised on each occasion of change of employees and the revised list provided to the Contracting Officer during weekly meetings.

1.2.3.1 Identification Credentials

Contractor personnel shall either be issued a photo identification card (ID) by the Contractor or agree to provide their individual vehicle driver's license as appropriate identification credential. In either case, the identification number shall be included on the listing required above. If the Contractor determines to issue ID cards to its employees, the following information shall be included:

Contractor Identification and Card Number Indicating Employees:

- | | |
|--|-------------------------------------|
| <input type="checkbox"/> Full Name | <input type="checkbox"/> Height |
| <input type="checkbox"/> Current Address | <input type="checkbox"/> Weight |
| <input type="checkbox"/> Birth Date | <input type="checkbox"/> Hair Color |
| <input type="checkbox"/> Recent Photograph | <input type="checkbox"/> Eye Color |

Contractor personnel shall be instructed to present identification credential upon request by proper authority as established by the Contracting Officer.

1.2.4 All vehicles entering the site shall be permitted and insured to the Contracting Officer's requirements and shall be properly maintained to be free of drips and leaks of oil and other fluids.

1.2.5 The Contractor shall instruct all persons who enter the watershed on its behalf the nature of the watershed and to the serious consequences arising from failure to comply with access guidelines. The Contractor shall provide a copy of these guidelines to all employees and agents who enter the watershed. A copy of these guidelines shall also be posted in a conspicuous place at each worksite. All gates at the worksite are provided to control access and shall be kept locked at all times, except as otherwise specifically approved by the Contracting Officer.

1.3 ACCESS ROAD

Access to the project is by the Tacoma Headworks Access road from Kanasket-Cumberland Road to the dam. The Government and its contractors have the right to use the one-lane access road to the dam site. However, usage of the road by the Government or its contractors is neither superior nor inferior to the rights of any other party. All parties authorized to use the road (including the Forest Service, the Department of Health and Human Services, and the City of Tacoma) do so on an equal basis. The speed limit is 35 mph on lengths of paved road, and 25 mph on gravel lengths. Original constructed

widths vary from 18' to 22'. Approximately one mile from the guard station toward the damsite is a one-lane bridge (originally a railroad bridge); all vehicles are required to come to a complete stop before proceeding onto this bridge.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

In the listing above, the "SU" designation means that rates listed under the identifier do not reflect collectively bargained wage and fringe benefit rates. Other designations indicate unions whose rates have been determined to be prevailing.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter

* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

(1) A code assigned by the Defense Logistics Information Service (DLIS) to identify a commercial or Government entity; or

(2) A code assigned by a member of the North Atlantic Treaty Organization that DLIS records and maintains in the CAGE master file. This type of code is known as an “NCAGE code.”

“Data Universal Numbering System +4 (DUNS+4) number” means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional CCR records for identifying alternative Electronic Funds Transfer (EFT) accounts (see Subpart 32.11 of the Federal Acquisition Regulation) for the same parent concern.

“Registered in the CCR database” means that--

(1) The Contractor has entered all mandatory information, including the DUNS number or the DUNS+4 number, into the CCR database;

(2) The Contractor's CAGE code is in the CCR database; and

(3) The Government has validated all mandatory data fields and has marked the records “Active.”

(b)(1) By submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the CCR database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.

(2) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation “DUNS” or “DUNS +4” followed by the DUNS or DUNS +4 number that identifies the offeror's name and address exactly as stated in the offer. The DUNS number will be used by the Contracting Officer to verify that the offeror is registered in the CCR database.

(c) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number--

- (f) The Contractor is responsible for the accuracy and completeness of the data within the CCR database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the CCR database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the CCR database to ensure it is current, accurate and complete.
