### Compromise Alternative

The compromise alternative was arrived through meetings involving elected officials at the County, State, and Federal levels, and management level representatives of the agencies. The compromise alternative is an attempt to address the concerns expressed at the public meeting while still obtaining maximum ecosystem benefits.

- Pros:
- High environmental benefit - 300 acres of salt marsh and 122 acres of waterfowl habitat.
  - No change in shoreline jurisdiction for Weyerhaeuser property.
  - Adjacent property owners protected from flooding by cross dikes.
  - Good option for road safety.
  - Funding currently available.
  - WSDOT receives mitigation credit.
  - Property flood water storage for cities upstream.

Cons:  
- Spartina risk.

Cost: \$4,707,000
