- **Complete Table 1 - Required**

NOTE: If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Section 10 navigable waters list, DO NOT USE THIS FORM TO MAKE THE DETERMINATION. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Section 10 RHA navigability determination.

#### B. CLEAN WATER ACT (CWA) SECTION 404 DETERMINATION OF JURISDICTION: "waters of the U.S." within CWA jurisdiction (as defined by 33 CFR part 328.3) in the review area. **Check all that apply.**

- **Complete Table 1 - Required**

This AJD includes a case-specific (a)(1) TNW (Section 404 navigable-in-fact) determination on a water that has not previously been designated as such. Documentation required for this case-specific (a)(1) TNW determination is attached.

Paragraph (b) Excluded Feature/Water Name	Rationale for Paragraph (b) Excluded Feature/Water and Additional Discussion.
Farm Pond	Although the City of Bothell's Wetland Inventory Map indicates possible hydrological connection or flow from the Farm Pond, the USFWS NWI, County Stream and Wetland Inventory, SalmonScape, and Topographical Maps from 2018 do not indicate connection to the subject Farm Pond or review area. The historic aerial imagery and topographic from 1952, 1969, and 1974 show the absence of the subject farm pond and the absence of mapped wetlands in the review area, however the historic imagery is not definitive because they are in black and white and are not distinct. The historic aerial imagery from 1980 however, does show the presence of the subject farm pond. The NRCS Soil Survey Map describes the soil in and around the review area as an Alderwood Urban land complex (2 to 8 percent slopes). The Alderwood series is typically moderately well drained, gravely sandy loam, and forested. Although the Alderwood series can contain areas of McKenna soil which is poorly drained and is a hydric soil, the Technical Memorandum photos and data points surrounding the pond indicated the pond is surrounded by uplands, consistent with that of the Alderwood series. Based on available information the pond appears to be created in the uplands for farming purposes, and therefore is considered an excluded b(4)(ii) water.
