Reference No.: NWS-2020-721

Name: City of Castle Rock Public Works

---

**ERRATUM/REVISION:** This erratum corrects the amount of material proposed to be dredged and clarifies the status of completed coordination with the Dredged Material Management Program (DMMP) on a U.S. Army Corps of Engineers (Corps)/Washington Department of Ecology (Ecology) Joint Public Notice dated February 23, 2021.

The corrected information is as follows:

The project proposes to continue maintenance dredging within the 0.02 acre area with up to 200 cy per year for a total of **2,000** cy dredged over a 10-year period. Material would be disposed in adjacent uplands.

The proposed dredged material has been **evaluated** according to the procedures specified by DMMP, a multi-agency program for the evaluation of dredged material. The DMMP evaluations may include both chemical and biological testing of sediments. For this project, the DMMP agencies determined that the material is of low concern for contamination. A 2018 DMMP decision document is available at the U.S. Army Corps of Engineers, Seattle District, Dredged Material Management Office.

All other information shown on Public Notice NWS-2020-721 remains unchanged.
